Age: 18

Gender: Male

<hr>

About Me:

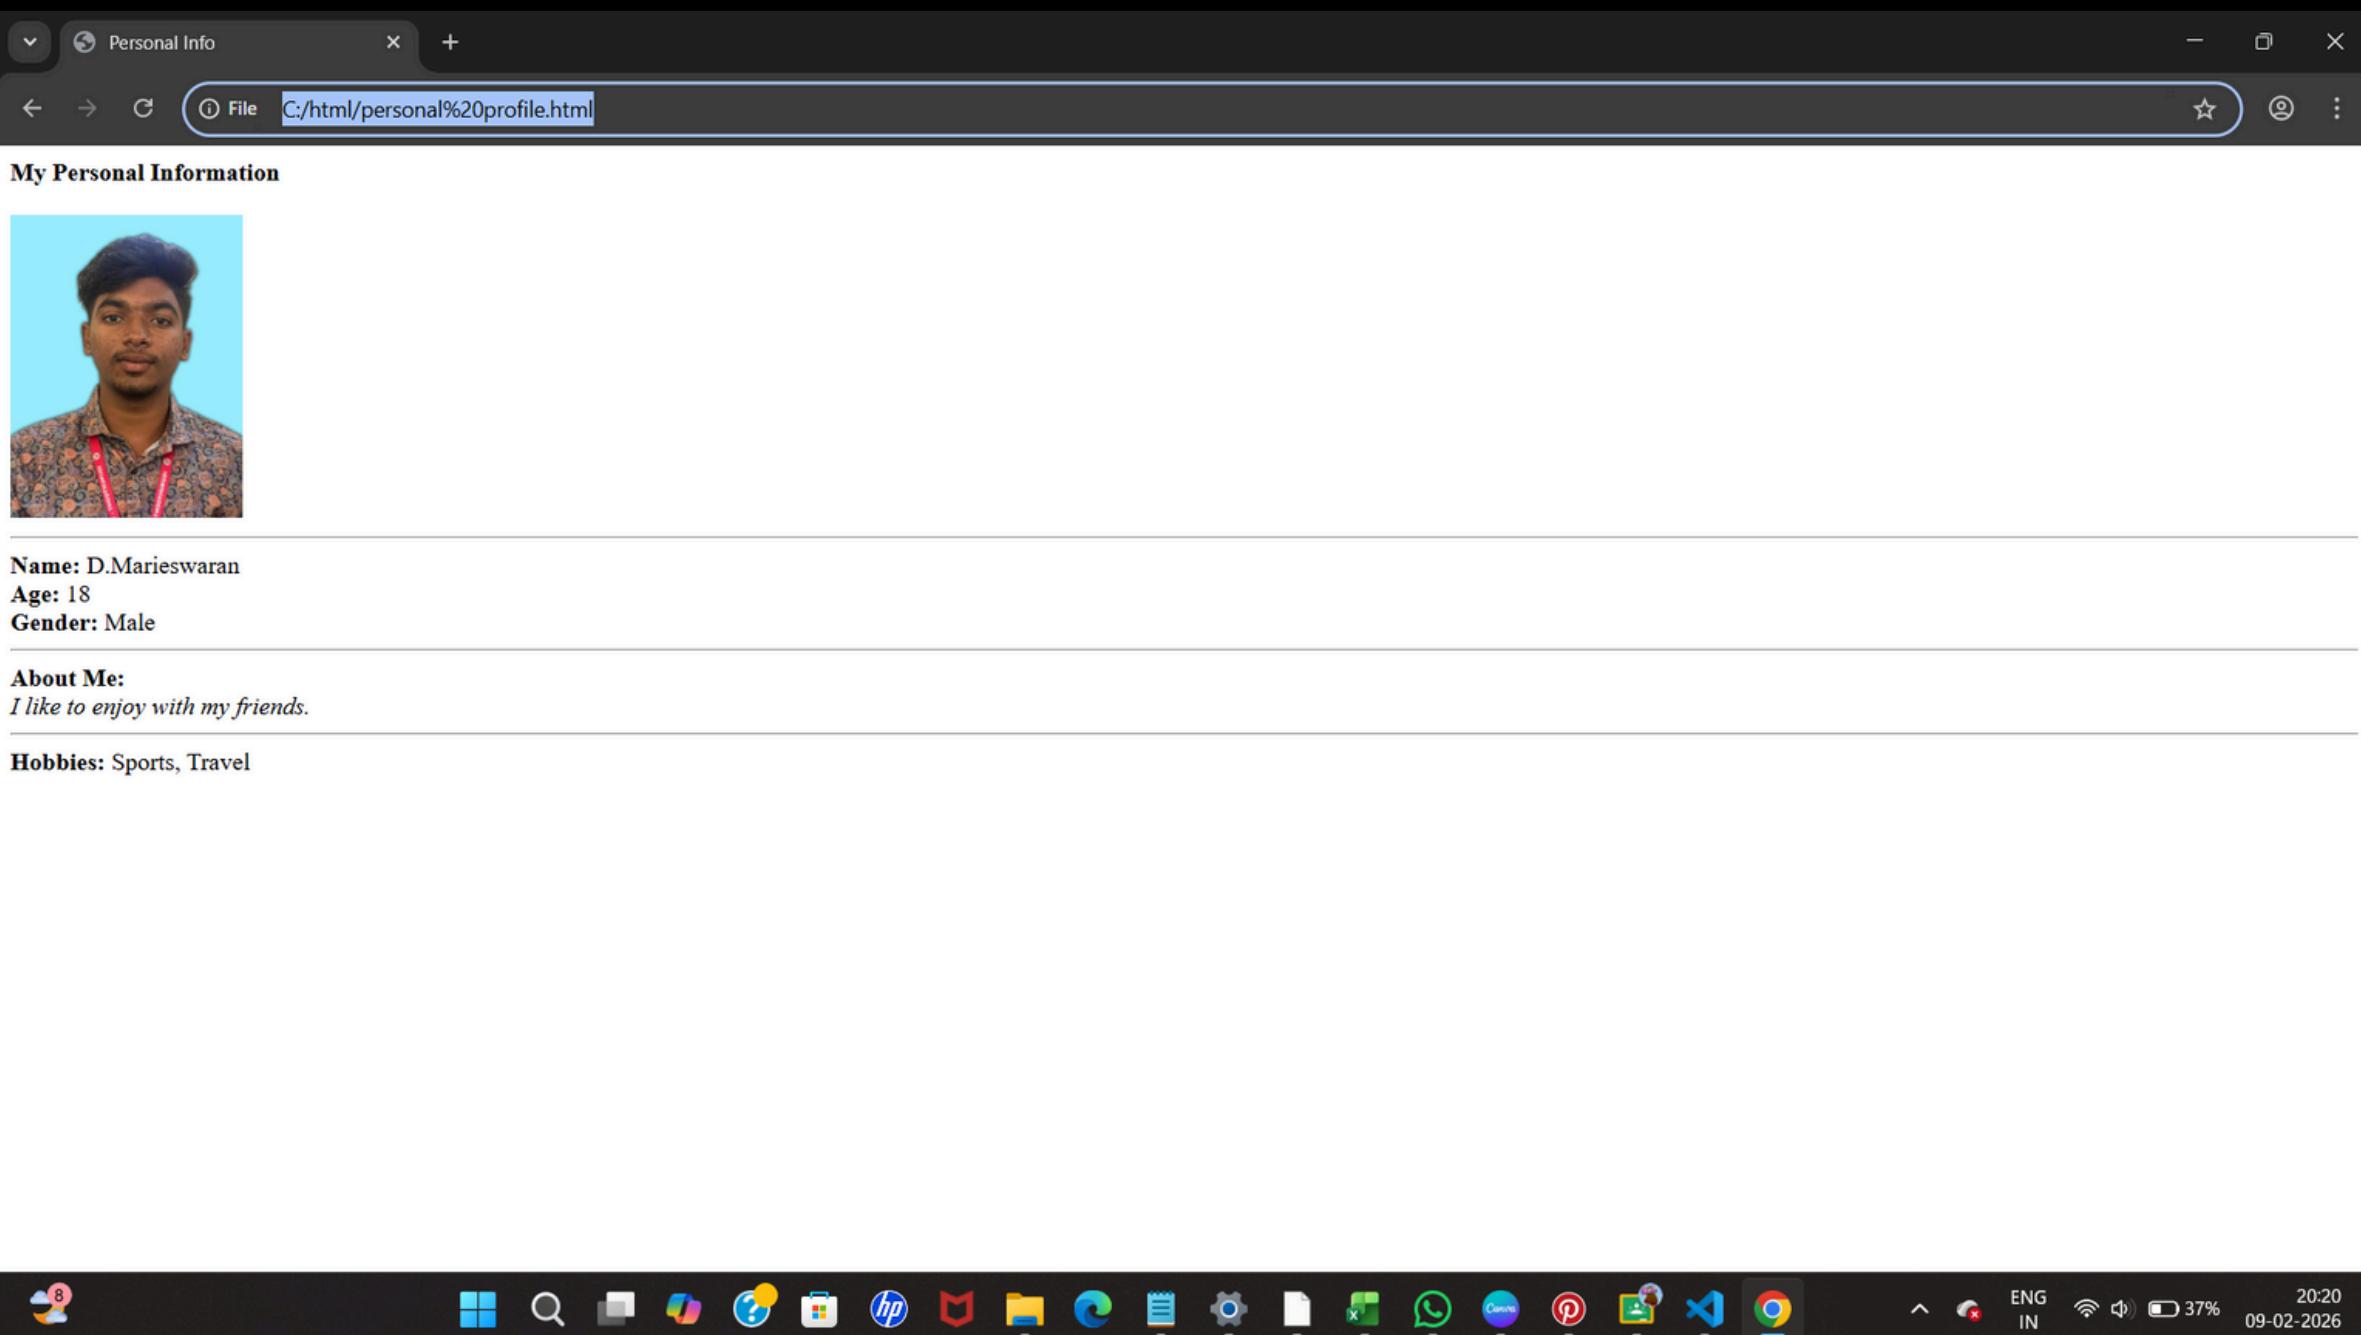

<i>I like to enjoy with my friends.</i>

<hr>

Hobbies: Sports, Travel

</body>
</html>

OUTPUT

EXPLANATION

This HTML program is used to create a personal information webpage.

The `<!DOCTYPE html>` tag defines the document as an HTML5 page.

The `<head>` section contains the title, which appears on the browser tab.

The `<body>` section displays all the visible content on the webpage.

The `` tag is used to show bold text for headings and labels.

The `` tag is used to display a photo with a specified width.

The `<hr>` tag creates horizontal lines to separate sections.

The `<i>` tag is used to display italic text for the “About Me” section.

CONCLUSION

This HTML program creates a simple personal profile webpage using headings, paragraphs, lists, and alignment tags

Thank You
