INTRODUCTION

A Registration Form is a web form that allows users to submit their personal details to a website or application. It is commonly used to create accounts, enroll in courses, or join services. Registration forms typically include fields like name, age, email, password, and contact information.

CODE

```
<!DOCTYPE html>
<html>
<head>
<body>
<form>
<table>
<tr>
<td>Name</td> <td><input type="text"></td>
<td>Email<input type="text"></td>
</tr>
<tr>
<td>Gender:</td>
<td><input type="radio">Male
<input type="radio">Female</td>
</tr>
<tr>
<td><input type="Submit" value="Send"></td>
</tr>
<tr>
<td>Course</td>
<td><Select name="Course">
<option>BCA</option>
<option>B.E(EEE)</option>
<option>BBA</option>
<option>B.COM</option>
<option>B.A</option>
</Select></td>
</tr>
<tr>
<td><h3>District</h3></td>
<td><select name="District">
<option>Thoothukudi</option>
<option>Madurai</option>
<option>Chennai</option>
<option>Tirunelveli</option>
</select></td>
</tr>
</table>
</form>
</body>
</head>
</html>
```

```
background: url("https://www.w3schools.com/html/images/html5.gif");
background-size: 100vw 100vh;
}
.box{
    position: absolute;
    top: 50%;
    left: 50%;
    transform: translate(-50%, -50%);
    width: 400px;
    padding: 40px;
    background: rgba(0, 0, 0, 0.5);
    box-sizing: border-box;
    box-shadow: 0 15px 25px rgba(0, 0, 0, 0.5);
    border-radius: 10px;
}
.box h2{
    margin: 0 0 30px;
    padding: 0;
    color: #fff;
    text-align: center;
}
.box h3{
    margin: 0 0 10px;
    padding: 0;
    color: #fff;
    text-align: center;
}
.box .inputP...>
```

EXPLANATION

<form> tag – Creates a form to collect user information.

Text fields (<input type="text">) – Used for Name and Email input.

Radio buttons (<input type="radio">) – Used to select Gender (only one option).

Dropdown menus (<select> + <option>) – Used for Course and District selection.

Submit button (<input type="submit">) – Sends the form data when clicked.

Table (<table>, <tr>, <td>) – Used to organize form fields neatly in rows and columns.

Headings (<h1>, <h2>, <h3>) – Add titles like Personal Profile, About Me, Skills, Education.

CONCLUSION

The registration form HTML program creates a webpage to collect user information like name, email, gender, course, and district. Using form elements such as text fields, radio buttons, dropdowns, and a submit button, it allows users to enter and select data easily. The use of tables and headings makes the form organized and readable, providing a basic structure for user registration on a website
